

## How to create a Facebook Platform Application

Here is a quick and easy 10 step guide to building and creating a facebook platform app.

- If you don't have one already, sign up for a facebook account.
- Add the facebook Developer Application to your facebook account.
- Download the client library of your choice.
- Request an API.
- Refer to FBML - The Facebook Markup Language.
- Visit the step by step guide to creating a facebook app and integrate a "Hello World" example.
- Take questions to the facebook developer FAQ.
- Get involved in facebook developer discussions.
- Create your facebook platform app. Test and debug.
- Submit to the Facebook Platform App directory
