# The Ultimate Graduation Resource List

Graduating from college can be a tough, but exhilarating experience for some individuals. Now is the time to put the books down and enter what we call the "real world". Some of you may have jobs lined up already, while others may choose to return to living in their parents basement. Whatever route you take, use these resources to help ensure you will go on to choose a successful career.

For many fresh out of college, it can be a tough time as you have the degree all employers want, but lack the few years work experience that all employers usually require. It's these next four or five years that will really set the pace to a successful career.

## Career Sites
